SUMMARY

Detail-oriented and motivated Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with a strong foundation in Data Structures & Algorithms, Python, and web technologies.

Hands-on experience in building AI-powered applications including LLM-based systems using Retrieval-Augmented Generation (RAG). Passionate about solving real-world problems, optimizing solutions, and continuously learning modern technologies.

Strong problem-solving mindset with growing expertise in scalable system design and GenAI applications.

EDUCATION

SR University, Warangal

B.Tech, Computer Science Engineering (AI & ML), CGPA: 8.58

Relevant Coursework: Data Structures & Algorithms Artificial Intelligence Machine Learning Database Management Systems Web Development.

EXPERIENCE

IStop.ai, Virtual Internship - AI & Machine Learning

- Completed virtual internship focused on Artificial Intelligence and Machine Learning concepts
- Worked on practical tasks involving Python and basic ML workflows
- Gained hands-on experience with AI tools and data analysis

AlgoUniversity, 2025Graph Camp - Data Structures & Algorithms

- Learned graph algorithms including BFS and DFS
- Practiced algorithmic problem solving techniques

PROJECTS

- AI DJ Maker (Python Application)** Developed an AI-based music automation tool using Python Implemented audio processing and playlist automation features Improved user interaction through intelligent music selection
- LLM-Based AI Applications** Built multiple GenAI applications including: AI Resume Analyzer AI Study Assistant (document summarization) MCQ Generator for interview preparation Implemented Retrieval-Augmented Generation (RAG) for better response accuracy Enhanced document understanding and automated content generation.
- EcoSort - Waste Segregation Web Application (Team Project)** Frontend Developer ,Developed responsive frontend with image upload and camera integration Integrated UI with backend APIs for real-time waste classification Contributed to building a user-friendly environmental solution.
- Web Calculator** Built a responsive calculator using HTML, CSS, and JavaScript Implemented arithmetic logic and interactive UI design

SKILLS

Programming: Python, JavaScript, C

Web Technologies: HTML5, CSS3

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

AI/ML: Artificial Intelligence, Machine Learning Basics, LLM Applications, Prompt Engineering, RAG.

Libraries/Tools: NumPy, Git, VS Code

LANGUAGE

- English (Fluent)
- Telugu
